General Investment Approach

Galleon Management, L.P. invests globally and in domestic companies, using a long/short approach, across all industries. The firm focuses on growth potentials of technology, healthcare, communications, financials and specialty retailing sectors. Galleon Management invests in particularly in the semiconductor, communications equipment, computers, software, technology services, Internet, e-commerce and wireless sub-sectors. The firm also invests in pharmaceutical, medical supply/technology, biotechnology, genomics, healthcare service and healthcare information technology companies. Galleon Management utilizes a combination of top-down, bottom-up and technical research approach in selecting investments. The firm makes use of top-down research to target sectors, bottom-up research to identify undervalued stocks that have growth catalysts, and technical analysis to set price targets and identify stop-loss targets. Galleon Management puts emphasis on small positions and pairs trading. Decision Making Process: The firm conducts external research and considers input from suppliers, customers and competitors. The firm meets with company management.

Affiliations

Founded: March 1997. Galleon Management, L.P. is a New York, NY-based privately-owned hedge fund management firm. The firm focuses on the technology, healthcare and communication sectors and manages the Galleon family of hedge funds.
