

**Prepared by Office of the Controller General of Patents,
Designs and Trade Marks,
Nizam Palace, A. J.C. Bose Road, Kolkata - 700 020**

Disclaimer

This information booklet provides basic information and guidance to potential users of the Design registration system in the Design Office, Kolkata. Information provided in this document is not exhaustive and may be read in conjunction with the Designs Act, 2000 and Rules, 2001. The guidelines in this document relating to the prescription of time limits, procedures, etc., are meant for guidance of the staff and members of the public. The provisions of the Designs Act 2000 and the Designs Rules, 2001 will, in all cases of disagreement, prevail. Instructions of the Government of India issued from time to time will also receive precedence over the guidelines in this document.

What is a Design?

A Design refers to the features of shape, configuration, pattern, ornamentation or composition of lines or colors applied to any article, in two or three dimensional (or both) forms. This may be applied by any industrial process or means (manual, mechanical or chemical) separately or by a combined process, which in the finished article appeals to and judged solely by the eye. Design does not include any *mode or principle of construction or anything which is mere mechanical device*. It also does not include any trade mark or any artistic work.

Benefits of Design Registration

The registration of a design confers upon the registered proprietor the exclusive right to apply a design to the article in the class in which the design has been registered.

A registered proprietor of the design is entitled to a better protection of his intellectual property. He can sue for infringement, if his right is infringed by any person. He can license or sell his design as legal property for a consideration or royalty. Registration initially confers this right for ten years from the date of registration. It is renewable for a further period of five years. If the fee for extension is not paid for the further period of registration within the period of initial registration, this right will cease. There is provision for the restoration of a lapsed design if the application for restoration is filed within one year from the date of cessation in the prescribed manner.

Essential requirements for registration

A design should:

- Be new or original
- Not be disclosed to the public anywhere by publication in tangible form or by use or in any other prior to the filling date, or where applicable, the priority date of the application for

registration

- Significantly distinguishable from known design or a combination of known designs
- Not comprise or contain scandalous or obscene matter
- Not be a mere mechanical contrivance.
- Be applied to an article and should appeal to the eye
- Not be contrary to public order or morality

Exclusion from scope of design.

Designs that are primarily literary or artistic in character are not protected under the Designs Act. These will include:

- book jackets, calendars, certificates, forms and other documents, dressmaking patterns, greeting cards, leaflets, maps and plans cards, post cards, stamps, transfers, medals
- labels, tokens, cards, cartoons
- any principle or mode of construction of an article
- mere mechanical contrivance
- buildings and structures
- parts of articles not manufactured and sold separately
- variations commonly used in the trade
- mere workshop alterations of components of an assembly
- mere change in size of article
- flags, emblems or signs of any country
- layout designs of integrated circuits

Who can apply for registration of a Design?

Any persons or the legal representative or the assignee can apply separately or jointly for the registration of a design. The term "person" includes firm, partnership and a body corporate. An application may also be filed through an agent in which case a power of attorney shall be filed.

Who can assist in registration of Design?

The Design office provides advisory services on how to file applications. The Design office may be approached for finding out whether a design has been previously registered. An Application may be prepared either by the applicant or with the professional help of attorneys. A list of patent attorneys is

Findings out whether any registration already exists

The Design office can assist if an application for search is made or an applicant can inspect the Register of Designs. To request for a search by the Design Office, the following documents should be filed to find out whether any registration exists in respect of any design:

- (1) If the registration number is known, Form No. 6 along with the prescribed fee of Rs. 500/-
- (2) If the representation of the article or the specimen of the article is filed (in duplicate), Form No. 7 along the prescribed fees of Rs. 1,000/-

Note: Before filing any an application, applicant can also obtain information whether the design has already been registered or not, by filing a request in Form 7.

Priority Date in case of Convention Applications

Any person who has applied for protection for any design in the convention countries or group of countries or countries which are members of inter-governmental organizations, or his legal representative or assignee, either alone or jointly with any other person, is entitled to claim registration of the said design citing a priority date in India. This date is the date of filing of the application in any of the countries mentioned above. However, the application

should be made in India within six months from the date of application for registration in those countries.

Cancellation of Registered Design

Any interested person can file a petition to the Controller seeking the cancellation of a registered design at any time after the registration of the design. An application for cancellation is admissible on the following grounds:

- that the design has been previously registered in India; or
- that it has been published in India or in any other country prior to the date of registration; or
- that the design is not a new or original design, or
- that the design is not registrable under this Act; or
- it is not a design as defined under of section 2(d).

Statutory time for the acceptance of an application?

Six months from the date of application which may be extended upon a petition by the applicant with the prescribed fee. This period may be extended on the discretion of the Controller in exceptional circumstances.

Inspection of the Register of Designs

Any person can inspect the Register of Designs upon request to the Controller with prescribed fee. This will enable an applicant to find out whether a design has been previously registered or not.

Fees

The fees for the registration and renewal of a design are :

- Application for registration of design Rs. 1,000/-
- Extension of copy right Rs. 2,000/-

(A detailed schedule of fee is available on page 21)

Any person who desires to register a design is re-

**Application
Procedure**

quired to submit the following documents to the Design Office at Nizam Palace, 2nd M.S.O. Building, The Patent Office, 234/4, A.J.C. Bose Road, Kolkata - 700 020 or any of the Branch Offices of the Patent Office at Delhi, Mumbai and Chennai. The applications received by the Branch Offices shall be transmitted to the Head Office for processing and prosecuting.

- (i) Application duly filed in on the prescribed form (Form-1) along with the prescribed fees, stating name in full, address, nationality, name of the article, class number, address for service in India. The application shall also be signed either by the applicant or by his authorized agent.
- (ii) Representation (in quadruplicate of size 33 cm X 20.5 cm with a suitable margin) of the article. Drawings/sketches should clearly show the features of the design from different views and state the view (e.g. front or side).
- (iii) A statement of novelty and disclaimer (if any) in respect of mechanical action, trademark, word, letter, numerals should be endorsed on each representation sheet which should be duly signed and dated

(Please see guidelines for preparation of representation sheet on page 13-14)

- (iv) Power of attorney (if necessary).

- (v) Priority documents (if any) in case of convention application claimed under Section 44 of the Designs Act, 2000.

(List of countries under Paris Convention and WTO may be seen on page 17-20).

An application accompanied by the prescribed fee

**Procedure for
Registration of designs.**

and four copies of the representation of the design, on receipt at the office, are numbered and dated in the Designs office and taken up for examination.

The number accorded to an application is in the order of its receipt and the date accorded to an application is the actual date of its receipt in the office.

Note: Applications unaccompanied by the prescribed fee or copies of the representation of the design will not be numbered and dated until the receipt of the fee or copies of the representation of the designs. The date allocated for such applications is the actual date of the receipt of all the documents in the office, and not the earlier date on which the application was first received in the office.

Defects in the application, if any noticed on examination of the application are communicated to the applicant or to his agent at the address for service. The defects should be corrected and the application resubmitted to the Design office for acceptance within six months from the official date of the application.

Acceptance & Notification: - An application is accepted when all the shortcomings have been rectified. It is then notified in the Official Gazette for objections, if any, from interested persons.

Refusal:- In case the defects as required by the Controller are not rectified, a personal hearing will be provided to the applicant. At such a hearing the controller will decide whether the application should be accepted or not.

The decision of the Controller will be communicated in writing to the applicant or his agent stating the reasons for the decision.

Appeals: - Any person aggrieved by the decision of the Controller refusing to register a design may appeal to the High Court. The appeal should be made within three months from the date of the Controller's decision.

Abandonment: - An application which owing to any neglect or default on the part of the applicant has not been completed so as to enable registration to be effected within six months will be treated as abandoned. Such an application cannot be revived and no further action will be taken on it by the Design office.

**Standard Form
of the statement
of novelty**

The following statement of novelty should be mentioned on the representation of a design as per the Act:

"The novelty resides in the shape and configuration of the article as illustrated."

"The novelty resides in the portion marked as 'A' and 'B' of the article as illustrated."

"The novelty resides in the ornamentation or surface pattern of the article as illustrated"

Example: The novelty resides in the floral ornamentation of the carpet as illustrated.

**Form of
disclaimers**

If the ornamental pattern on an article is likely to be confused with a trade mark, a disclaimer may be made in the following manner:

No claim is made by virtue of this registration to any right to the use as a trade mark of what is shown in the representations.

If the representation suggests any mechanical action of the article a disclaimer may be inserted in the following manner:-

No claim is made by virtue of this registration in respect of any mechanical or other action of the mechanism whatever or in respect of any mode or principle of construction of the article.

If the representation contains words, letters, numerals, etc., a disclaimer may be inserted in the following manner:-

No claim is made by virtue of this registration to any right to the exclusive use of the words, letters, numerals, flags, crowns, etc. appearing in the design.

Guidelines for the preparation of representation sheet

A representation sheet of an article is an important document required to be filed in quadruplicate along with the application for registration. Representation means the exact representation of the article on which the design has been applied. It should be prepared on white A4 size paper of durable quality but should not be prepared on card board or should not be mounted on other paper.

The following points should be considered while preparing a representation.

- The article must be shown in isolation and features of the design must be clearly and accurately visible.
- The article shown in the drawing should be consistent with the name of the article mentioned in the application form. The name of the article should be such that is known in the trade.
- The margin of the representation sheet should be one and half on all sides.
- The figure shown should be of sufficient scale in order to visualize all the details of the features of the design applied to the article.
- The figure should be shown in upright position

with respect to top and bottom position of the sheet.

- The name of the applicant should be mentioned in left hand top corner of the sheet.
- The total number of sheets and sheet number should be mentioned in the right hand top corner of the sheet.
- The signature of the applicant/agent should be made in the right hand bottom corner mentioning the name of the signatory there under.
- No descriptive matter or denoting the components by reference letter/numerals should be included other than showing the particular portion of the article where novelty resides.
- A sufficient number of views should be incorporated in the representation sheet in order to show the article completely and to visualize the exact nature of the design clearly.
- No sectional view should be incorporated in the representation sheet.
- No dimensions or engineering symbol etc. should be mentioned in the representation sheet. The representation is not to be regarded as engineering drawing of the article.
- Unnecessary matter not being the feature of the design such as Trade Marks, Letters, and Numerals etc should not be included. However, if it is integral with the article so represented a disclaimer to that effect should be provided.
- Photographs should be covered with cellophane paper in order to prevent it from sticking to other pages.
- Drawings should be clear and should be prepared in a manner that clear reproduction of the views is possible on imaging and are reproducible by photocopying.
- A clear photocopy of the original representation 32

sheet may be filed for other copies of the representation sheet except when a photograph of the original representation has been filed.

- No extraneous matter or background support surface, shadows, brick walls, trees etc. should appear in the representation sheet.
- Hidden parts that are not visible in the Finished article should not be shown. Exploded view should be avoided.
- In order represent a set, the whole set should be shown clearly with different views as required.
- Perspective views are most preferable. Odd angle views which distort the shape should not be filed.
- A brief statement of novelty, claim of features of design, which is new and original, are required to be mentioned on each set of representation sheet. No description stating the features of the design should be incorporated.
- If there is any other matter appearing in the representation not being the feature (s) of the design, a statement of disclaimer is required to be mentioned in each set of the representation sheet as required.
- Shading / etching lines may be used only if these are absolutely essential to the sense of the shape of the article and should be normally and should be normally avoided.

Classification of designs in classes

Designs are required to categorized in separate classes in order to provide for systematic registration. An International classification of Industrial Designs according to the Locarno Agreement has been introduced in the Designs Rules, 2001. The classification of goods is based upon the function of the classification of goods is applied. There are

Classes and most of the classes are further divided into sub-classes. These classes and sub-classes are mainly function oriented. In some specific cases, the function of the article is required to be mentioned along with the name article in the application form for the purpose of classification.

Normally, the name of the article should be such that is common/familiar in the trade or Industries. The name of the article as mentioned in the application form should correspond with the representation of the article as filed.

Example : if the article relates to 'chair' or sofa-cum-bed', the name should be provided according and should be classified under Class 06 and sub-class - 01 where it is stated as BEDS AND SEATS since it is classified in function/purpose oriented manner.

(Details of Locarno Classification may be seen at page)
